

Ibrahim Albatrawshy

Software Engineer | Flutter & React

ibrahimalbatrawshy@gmail.com | +02 01113669782 | Cairo, Egypt | [Github](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Junior Software Engineer specializing in Flutter and React development with experience building scalable cross-platform and web applications using Firebase, REST APIs, and modern frontend architectures. Passionate about clean code, performance optimization, and responsive UI/UX design.

EXPERIENCE

Software Development - Cross Platform Mobile App Developer,

07/2025 – 12/2025 | Cairo, Egypt

[DEPI](#) 

- Architected and maintained a production-ready mobile application using **Flutter & Dart**, ensuring high performance on both Android & iOS.
- Implemented robust **state management** using Bloc/Cubit, reducing app complexity and improving data flow integrity.
- Integrated secure authentication** and real-time data synchronization via Firebase, enhancing user data integrity.
- Collaborated on UI/UX** best practices to deliver a responsive and intuitive user interface.

Frontend Development Trainee,

08/2025 – 09/2025 | Cairo, Egypt

[Information Technology Institute \(ITI\)](#) 

- Engineered responsive SPAs** (Single Page Applications) using React.js, Hooks, and Tailwind CSS, focusing on mobile-first design.
- Optimized web performance and ensured cross-browser **compatibility through clean code** and modern CSS frameworks like Bootstrap.

EDUCATION

The bachelor of computer science, *Future Academy - Higher Future Institute For Specialized Technological Studies*

10/2022 – Present | Cairo, Egypt

SKILLS

Languages: Dart, JavaScript (ES6+), TypeScript, Java

Mobile Development: Flutter, Android SDK, Firebase Auth/Firestore

State Management: Bloc, Cubit, Provider, HydratedBloc, React Hooks

Backend & Database: Firebase, PocketBase, REST APIs, Sqlite

Web Development: React 19, Next.js 16, Tailwind CSS v4, HTML5/CSS3

Tools: Git, GitHub, Figma

PROJECTS

ASL Brand E-Commerce , *Frontend / Full-Stack Developer*

03/2026 – 05/2026

- Technologies:** Next.js 16, React 19, TypeScript, Tailwind CSS v4, Zod, Google APIs
- E-Commerce Storefront:** Designed and developed a high-performance, responsive e-commerce web application for a premium apparel brand using the Next.js App Router and React 19.
- Dynamic Product Catalog:** Engineered a complex product presentation system supporting multi-variant selection (colors, sizes, dynamic image galleries) and automated pricing/discount logic.
- Order Management Integration:** Built backend API routes that integrate with **Google APIs** (Google Sheets) to securely process user orders and streamline business fulfillment workflows.
- Robust Form Validation:** Implemented strict type safety and schema validation across the application using TypeScript and Zod to ensure reliable data submission during checkout.

- **Premium UI/UX Design:** Crafted a modern, high-end user interface using **Tailwind CSS v4**, focusing on visual consistency, smooth micro-animations, and optimized Arabic typography.
- Horas - AI-Powered Online Exam Proctoring System,

10/2025 – 05/2026

Graduation project

 - Project Overview: **A full-stack**, real-time academic proctoring platform utilizing a **React/FastAPI** stack and an **AI computer vision engine to monitor** student exams and ensure integrity.
 - UI/UX Development: Built a highly responsive Single Page Application (SPA) using **React 18, Vite, and Tailwind CSS** with distinct, **role-based dashboards** for students and examiners.
 - Real-Time AI Integration: Implemented **WebSocket streaming** to transmit **live student webcam** feeds to the backend AI engine for anomaly detection (e.g., object detection, gaze tracking).
 - Advanced Features: Engineered complex state management (custom hooks) for multi-step exam creation, integrated Google OAuth2, and utilized the **Gemini API** for automated client-side exam file parsing.
- Movie Explorer Application , using React

09/2025 – 09/2025

 - Developed a responsive, single-page movie discovery application using **React 19 and Vite**, integrating the **TMDB REST API** to fetch and display real-time data for popular, top-rated, and upcoming movies.
 - **Implemented client-side routing** with React Router v7 for seamless, fast navigation across multiple views including search, detailed movie profiles, and personalized lists.
 - Engineered a custom state management solution utilizing React **Hooks and browser LocalStorage** to handle user sessions and enable personalized features like Favorites and Watch Later lists.
 - Designed a modern, mobile-first user interface utilizing **Bootstrap 5, custom CSS**, and responsive layouts to ensure an optimal viewing experience across all devices
- HiddenTreasures-DEPI ,

06/2025 – 07/2025

Cross-Platform Mobile Application | Flutter, Firebase, BLoC

 - **Developed a full-featured cross-platform mobile application** using Flutter targeting Android, iOS, Web, and Desktop.
 - Implemented secure authentication using **Firebase Auth** (Email/Password, Google Sign-In) with mandatory email verification and cooldown-based resend flow.
 - Applied advanced **state management** using BLoC/Cubit with HydratedBloc for persistent and scalable app state.
 - **Integrated Google Maps**, geolocation services, and route drawing (polylines).
 - **Built multiple** feature modules including favorites management, user profiles, notifications, chatbot, and payment UI using credit card components.
- Online Education App , using Flutter

04/2025 – 05/2025

 - Results-driven Mobile Developer with expertise in building high-performance, cross-platform applications using Flutter and Dart.
 - Skilled in developing full-stack solutions by integrating responsive front-end UIs with robust backends such as PocketBase.
 - Experienced in enabling real-time data synchronization, secure user authentication, and efficient content management.
 - Strong understanding of state management, clean architecture, and scalable app development practices.
- E-commerce Mobile App (Flutter & REST API) , using flutter

11/2024 – 12/2024

 - Engineered a full-featured online shopping application, providing a seamless user experience across Android and iOS devices using Flutter.
 - Leveraged Dart and Flutter's widget-based architecture to create an intuitive and visually appealing user interface.
 - Established robust communication with a backend system via RESTful APIs, managing critical functionalities.
 - Focused on performance optimization and a clean, maintainable codebase, demonstrating strong proficiency in mobile application development and API integration.
- Data Structure Project, Columbus State University

11/2023 – 01/2024

 - Created interactive data structure visualizations using Java and the BRIDGES library.
 - Strengthened understanding of data structures through practical development.
 - Collaborated with an international academic team, enhancing communication and teamwork skills.
